

CITY OF DETROIT
WATER AND SEWERAGE DEPARTMENT
BOARD OF WATER COMMISSIONERS

RULES
FOR
HAULED-IN LIQUID WASTES

NOTE: These rules have been adopted pursuant to the provisions of Sec. 2-111 of the Charter of the City of Detroit. Effective date: January 1, 1986.

These rules apply to the direct discharge of liquid wastes into the Detroit Water and Sewerage Department's Sewage Disposal System or any tributaries thereof throughout its regional service area by means other than a permanent underground sewer connection from the sewer user's facilities to the public sewer. Discharge of hauled-in or pumped-in wastes into manholes, catch basins, floor drains or other openings on public or private property which outlet directly into a public sewer is prohibited except at unloading sites approved by DWSD.

A. The Provision of Unloading Sites

For the protection of the public health, safety and welfare and to accommodate the need for wastewater unloading sites for vehicles hauling liquid wastes in or near the DWSD sewage disposal service area, DWSD may make formal arrangements with public agencies who have entered into wholesale wastewater disposal service agreements with DWSD to provide and maintain a number of sites within their political boundaries at which certain liquid waste haulers may be authorized to unload their vehicles into the sewerage system provided the requirements of the agency and DWSD are met.

The number and location of such sites may vary from time to time. However, no sites shall be added or deleted except upon 90 days prior written notice by the agency to DWSD.

For each site proposed to be provided and operated within an agency's service area, the following information shall be provided to DWSD on forms provided by DWSD for prior review and approval by DWSD:

1. An 8-1/2" x 11" sketch showing the exact location of the unloading point and an overall layout of the facility.
2. The operating hours of the facility.
3. The means by which access to and use of the site will be controlled.
4. The means by which the quantities and concentrations of discharged materials will be determined and reported to DWSD.
5. The types of users proposed to be allowed to unload at each site and the kinds of materials proposed to be accepted at each site.
6. The procedures to be utilized to assure payment of applicable fees and rates to DWSD.
7. The means by which the agency will enforce its requirements and the requirements of DWSD for use of the facility.
8. The means by which the agency will keep each site clean and properly maintained.
9. Other information as may be requested by DWSD.

No site shall be operated without DWSD approval.

DWSD shall have the right to enter upon approved sites during their operating hours for the purpose of monitoring usage of sites, collecting samples, obtaining information from users, verifying records and permits and enforcing its requirements. DWSD shall be granted access to all required records and documents during regular business hours. DWSD shall also have the right to call upon enforcement authorities to enter upon the site to enforce requirements under the law.

The usage of each site is restricted to the types of users and kinds of materials approved by DWSD for unloading at each site. All other users and materials are prohibited.

Persons other than municipal corporations holding Wastewater Disposal Service agreements directly with DWSD who propose to provide, operate and maintain a vehicle unloading site serviced by the DWSD system shall be required to provide, at their own expense, a \$50,000 surety bond payable to DWSD to assure the collection and payment to DWSD of any fees or rates to be paid by the hauler and the site operator to DWSD at the time of unloading and to compensate DWSD for any damage it may suffer by reason of the operator's non-compliance with all applicable laws, rules, regulations and DWSD's conditions attached to the approval. The life of the bond shall be for the duration of DWSD's approval of the site.

In addition to approved suburban unloading sites, the Detroit Wastewater Treatment Plant at 9300 W. Jefferson Avenue, Detroit, Michigan 48209 shall also be designated as an approved unloading site.

B. The Usage of Unloading Sites

The usage of each unloading site shall be restricted. Only persons and vehicles possessing a valid Unloading Permit issued by DWSD or its authorized agents may utilize the unloading sites and only under the conditions stated herein and on the permit.

The requirements as pertain to each category of user are as stated below:

1. Septage Tank Waste Haulers

Septage haulers authorized to use the approved sites shall be only those having a valid servicing license and a valid vehicle license issued by the Michigan Department of Natural Resources under Public Act #243 or a successor act and Amendments thereto and a valid DWSD Septage Hauler's Unloading Permit.

The only material which haulers are authorized to unload into the sewerage system under this section are the contents of domestic waste septic tanks, cesspools, seepage pits, sewage lift stations and portable toilets. Materials other than domestic wastes are prohibited under this section. (Grease trap cleanings and waste cooking and frying oils and greases from food establishments are specifically prohibited under this section.)

To obtain a DWSD Septage Hauler Unloading Permit, the owner of the company shall make written application to DWSD, 735 Randolph, Detroit, Michigan 48226 on forms provided by DWSD. The applicant shall furnish all the information requested by DWSD, such as, but not limited to, the name of the company, the name of the chief executive officer, the company address and phone number, the MDNR servicing license number and expiration date, the MDNR vehicle license numbers to be included under such application and their respective expiration date and the general service area of the company. The applicant shall post a \$10,000 surety bond to assure payment to DWSD for all materials unloaded into the system and to compensate DWSD for damages suffered by reason of the permittee's non-compliance with all applicable laws, rules, regulations and the DWSD Septage Hauler Unloading Permit. The life of the bond shall be for the duration of the permit issued by DWSD and any renewals thereof. If the application is found to be acceptable, DWSD will issue a Septage Hauler Unloading Permit. The expiration date shall be the same as that of the MDNR's Septage Waste Servicing License. The company shall abide by the conditions stated on the permit. Failure to comply shall be cause for revocation of the DWSD permit.

One DWSD permit per company shall cover the entire fleet of vehicles of that company provided that the company has furnished DWSD with the MDNR vehicle license number for each such vehicle. A copy of the DWSD permit shall be carried at all times in each vehicle.

Properly licensed and permitted septage haulers may unload their vehicles only upon pre-payment of applicable fees and rates. Pre-payment shall be in the form of a purchase of unloading Tickets from DWSD or an authorized agent or the purchase of equivalent tokens from an authorized agent. As a point of reference, effective July 1, 1985, the fee for DWSD is \$10.00 for a load of up to 500 gallons or any lesser fraction thereof. For loads of more than 500 gallons, additional \$10.00 fees must be paid for each additional 500 gallons or fraction thereof for each load. In addition to DWSD's fee, an authorized agency may charge an additional service fee. All fees are subject to periodic changes by DWSD or the authorized agency for their respective fees.

Septage haulers must submit evidence of having valid MDNR servicing and vehicle licenses and valid DWSD unloading permits before being authorized to pre-purchase tickets. Tickets may be purchased in unlimited quantities at 735 Randolph, Detroit, Michigan 48226. Septage haulers shall follow procedures established by the authorized agency for the use of the agency's facilities.

Septage haulers shall fill in the reverse side of each prepaid ticket before submitting it to the authorized agency to show the company's name, the DWSD permit no., the name of the unloading site, the date and time unloaded, the MDNR vehicle license number, the hauler's servicing license number, the address or addresses of the source of the material and the driver's signature.

DWSD shall have the unrestricted right to observe the loading, hauling and unloading of septage hauling vehicles; to obtain representative samples of the vehicle's contents at the unloading site prior to and during the unloading activity; to examine the vehicle operator's MDNR servicing license and vehicle license and the DWSD unloading permit at the unloading site; and to question the vehicle operator at the unloading site as to the origin and quantity of material on the vehicle. The vehicle operator shall cooperate in furnishing the above information and assist DWSD's representative in obtaining representative samples.

The septage hauler shall paint or affix the DWSD permit number shown at the top of his or her permit on each side and the rear of each hauling vehicle covered by his or her permit in clearly visible locations in black numerals and letters six inches high on a white background at least eight inches high. The line width of each number or letter shall be three-fourths of an inch.

Failure to abide by the conditions of DWSD's permit shall be cause to deny the vehicle operator the privilege of unloading the vehicle.

Violation of the conditions of DWSD's permit shall be cause for revocation of the permit.

Unloading into DWSD's system without a DWSD permit is prohibited.

2. Recreational Vehicle Toilets and Individual Portable Toilets

Persons may discharge the contents of recreational vehicle toilets and individual portable toilets having contents of less than 125 gallons at approved locations at no charge by DWSD.

A listing of approved unloading locations will be available at DWSD's main office at 735 Randolph, Detroit, Michigan, in the Commercial Division.

Users shall comply with the site operator's requirements. DWSD shall have the right to inspect and sample the materials discharged to the system. Only domestic sanitary waste is acceptable for discharge under this Section B.2.

Unloading under the provisions of this Section B.2. is restricted to private persons and firms possessing and servicing not more than 3 portable toilets.

3. Hauled-In Municipal Sludge

The sludge or effluent from a publicly owned treatment works, including municipally owned package treatment plants, shall not be discharged to the DWSD system either directly or indirectly except under prior specific arrangements made with DWSD.

A community or agency desiring to dispose of municipal sludge or wastewater into the DWSD system shall make written application to DWSD on forms provided by DWSD to initiate the approval process. DWSD reserves the right to deny any applicants a permit without giving the reasons therefor. If a permit is not forthrightly denied, DWSD will investigate and evaluate the application. Representative samples of the proposed material will be collected and analyzed by DWSD. The requesting agency will have the opportunity to split samples and analyze them. If concentrations of restricted industrial wastes are found to be present or expected to be present in concentrations greater than those ordinarily found in comparable DWSD sludge or effluent, this shall be grounds for denying a DWSD permit.

If the publicly owned treatment works (POTW) from which the sludge is being shipped provides service to industrial users whose discharge is subject to regulation by the USEPA National Categorical Pretreatment Standards, or if the industrial discharges into the POTW contains substances subject to regulation by the municipality's NPDES permit or DWSD's NPDES permit or by the City of Detroit's Industrial Waste Control Ordinance the same as if that industry were located within the City Limits of the City of Detroit, then the municipal corporation which operates the POTW and under whose jurisdiction such industries are located, shall be required to enter into a separate agreement with DWSD which will empower DWSD to have unrestricted control over the industrial users in the community which is generating the sludge or effluent proposed to be discharged into DWSD's system. DWSD's powers shall include but not be limited to making DWSD's entire Industrial Pretreatment Program applicable to the community including, but not limited to, information gathering, surveilling, monitoring, collecting and analyzing samples, issuing Industrial Discharge Permits, taking enforcement actions, collecting fees and penalties and all other actions necessary to protect DWSD's best interests and the public health, safety and welfare for the period during which sludge is being accumulated in the POTW for ultimate discharge to DWSD's system.

If the sludge or effluent is found to be acceptable for discharge into the DWSD system and an appropriate Industrial Waste Control Agreement is entered into with DWSD, then arrangements for measurement and payment shall be developed. As a minimum, DWSD shall be paid the applicable volumetric treatment rate plus the surcharge rates which are in effect at the time of discharge for compatible pollutants. DWSD shall also have the right to assess additional fees for processing the application, performing evaluation sampling and analysis and issuing a Wastewater Unloading Permit. Rates and fees shall be paid in a timely manner in accordance with fee and rate schedules established from time to time by the Detroit Board of Water Commissioners.

The amount to be paid DWSD for treatment of each load shall be determined by sampling and measurement methods established by DWSD for each specific discharge. Payment conditions are to be embodied in the DWSD permit. Upon approval of the application, DWSD will issue a Wastewater Unloading Permit. Each DWSD permit shall be for materials from a specific

source for a specific duration or for a specific quantity. The discharge of other than approved materials into the DWS system is prohibited. The permittee shall be subject to the conditions stated on the permit as well as all applicable laws, rules and regulations.

Permittee shall unload into DWS's sewerage system only at approved locations. Current listings are available from DWS's Commercial Division offices at 735 Randolph, Detroit, Michigan 48226.

No discharge shall be made to the DWS system except under a valid DWS Wastewater Unloading Permit. The DWS permit may be revoked if used for any other purpose or source of materials. The DWS permit shall be revoked in the event of non-payment by the permittee for services rendered by DWS.

DWS shall have the right to restrict times and dates during which the permittee may discharge into the DWS system. Such restriction may be in the form of oral or written notice at least four hours in advance of the unloading time.

A copy of the DWS permit shall be carried in the hauling vehicle at all times during which the permitted materials are being hauled.

The hauler shall paint or affix the DWS permit number shown at the top of the applicable DWS permit on each side and the rear of each hauling vehicle covered by the applicable DWS permit in clearly visible locations in black numerals and letters six inches high on a white background at least eight inches high. The line width of each number or letter shall be three-fourths of an inch.

DWS shall have the unrestricted right to observe the loading, hauling and unloading of hauling vehicles; to obtain representative samples of the vehicle's contents at the unloading site prior to and during the unloading activity; to examine the vehicle operator's MDNR servicing license and vehicle license and the DWS unloading permit at the unloading site; and to question the vehicle operator at the unloading site as to the origin and quantity of material on the vehicle. The vehicle operator shall cooperate in furnishing the above information and assist DWS's representative in obtaining representative samples.

4. Hauled-In Grease Trap Cleanings, Waste Cooking and Frying Oils and Greases from Food Establishments

Hauled-in grease trap cleanings and waste cooking and frying oils and greases from food establishments should not be discharged into the DWS System either directly or indirectly because of the risk potential to the well being of the system and the receiving waters. Such wastes, whenever possible, are to be disposed of in commercial facilities specializing in the reclamation, rendering, disposal, destruction or burial of such wastes.

In the event of extenuating circumstances, if the waste is known to contain no pollutants in excess of DWSD's limits for compatible or non-compatible pollutants, application may be made by the party having custody of the waste for a DWSD Wastewater Unloading Permit on forms provided by DWSD. The DWSD reserves the right, however, to deny such permit without giving the reasons therefor and to prohibit the discharge of the material into the DWSD System or to revoke the permit at any time if issued. If the permit is not forthrightly denied, DWSD will investigate and evaluate the application. Representative samples of the proposed material will be collected and analyzed by DWSD. The applicant will have the opportunity to split samples and analyze them. If concentrations of restricted pollutants are found to be present or expected to be present in concentrations greater than those specified in Detroit's Industrial Waste Control Ordinance, this shall be grounds for denying a DWSD permit. If it is found legally appropriate to enter into such arrangements, then the arrangements shall attest that the materials proposed for discharge into DWSD's system are legally authorized to be transported and unloaded directly into DWSD's system. The hauler shall provide evidence of Michigan Department of Natural Resources authorization under Public Acts of Michigan to have the waste discharged into DWSD's system as proposed.

If the waste is found to be acceptable for discharge into the DWSD system, then arrangements for measurement and payment shall be developed. As a minimum, DWSD shall be paid the applicable volumetric treatment rate plus the surcharge rates which are in effect at the time of discharge for compatible pollutants. DWSD shall also have the right to assess additional fees for processing the application, performing evaluation sampling and analysis and issuing a Wastewater Unloading Permit. Rates and fees shall be paid in a timely manner in accordance with fee and rate schedules established from time to time by the Detroit Board of Water Commissioners.

The amount to be paid DWSD for treatment of each load shall be determined by sampling and measurement methods established by DWSD for each specific discharge. Payment conditions are to be embodied in the DWSD permit. At DWSD's option, it may require the applicant to post a \$10,000 surety bond to assure payment to DWSD for all materials unloaded into the system and to compensate DWSD for damages suffered by reason of the permittee's non-compliance with all applicable laws, rules, regulations and the DWSD Wastewater Unloading Permit. The life of the bond shall be for the duration of the permit issued by DWSD and any renewals thereof. Upon approval of the application, DWSD will issue a Wastewater Unloading Permit. Each DWSD permit shall be for materials from a specific source for a specific duration or for a specific quantity. The discharge of other than approved materials into the DWSD system is prohibited. The permittee shall be subject to the conditions stated on the permit as well as all applicable laws, rules and regulations.

Permittee shall unload into DWSD's sewerage system only at approved locations. Current listings are available from DWSD's Commercial Division offices at 735 Randolph, Detroit, Michigan 48226.

No discharge shall be made to the DWSD system except under a valid DWSD Wastewater Unloading Permit. The DWSD permit may be revoked if used for any other purpose or source of materials. The DWSD permit shall be revoked in the event of non-payment by the permittee for services rendered by DWSD.

DWSD shall have the right to restrict times and dates during which the permittee may discharge into the DWSD system. Such restriction may be in the form of oral or written notice at least four hours in advance of the unloading time.

A copy of the DWSD permit shall be carried in the hauling vehicle at all times during which the permitted materials are being hauled.

The hauler shall paint or affix the DWSD permit number shown at the top of the applicable DWSD permit on each side and the rear of each hauling vehicle covered by the applicable DWSD permit in clearly visible locations in black numerals and letters six inches high on a white background at least eight inches high. The line width of each number or letter shall be three-fourths of an inch.

DWSD shall have the unrestricted right to observe the loading, hauling and unloading of hauling vehicles; to obtain representative samples of the vehicle's contents at the unloading site prior to and during the unloading activity; to examine the vehicle operator's MDNR servicing license and vehicle license and the DWSD unloading permit at the unloading site; and to question the vehicle operator at the unloading site as to the origin and quantity of material on the vehicle. The vehicle operator shall cooperate in furnishing the above information and assist DWSD's representative in obtaining representative samples.

5. Hauled-In Industrial Wastes (includes but is not limited to spill cleanups, toxic waste site cleanups, fire cleanups, spent pickling liquor, spoiled products)

Hauled-in industrial wastes should not be discharged into the DWSD System either directly or indirectly because of the risk potential to the well being of the system and the receiving waters. Such wastes are to be disposed of in commercial facilities specializing in the reclamation, rendering, disposal, destruction or burial of non-hazardous, hazardous or potentially hazardous wastes.

In the event of extenuating circumstances, if the waste is known to contain no pollutants in excess of DWSD's limits for compatible or non-compatible pollutants, application may be made by the party having custody of the waste for a DWSD Wastewater Unloading Permit on forms provided by DWSD. The DWSD reserves the right, however, to deny such permit without giving the reasons therefor and to prohibit the discharge of the material into the DWSD System or to revoke the permit at any time if issued. If the permit is not forthrightly denied, DWSD will investigate and evaluate the application. Representative samples of the proposed material will be collected and analyzed by DWSD. The applicant will have the opportunity

to split samples and analyze them. If concentrations of restricted industrial wastes are found to be present or expected to be present in concentrations greater than those specified in Detroit's Industrial Waste Control Ordinances, this shall be grounds for denying a DWSO permit. If the source of the industrial waste is other than from an industry under the direct jurisdiction of DWSO's Industrial Pretreatment Program, then separate arrangements shall be made between DWSO and the agency having Industrial Waste Control jurisdiction over the industrial discharge or the agency having custody of the industrial waste. If it is found legally appropriate to enter into such arrangements, then the arrangements shall attest that the materials proposed for discharge into DWSO's system are legally authorized to be transported and unloaded directly into DWSO's system. The hauler shall provide evidence of Michigan Department of Natural Resources approval under Public Act No. 136 or any successor acts or amendments thereto to have the industrial waste discharged to DWSO's system as proposed. In some instances pretreatment of the liquid waste may be required before discharge of the liquid fraction of the material can be permitted to be discharged into DWSO's system. The solids or semi-solids fraction shall not be discharged into DWSO's system in such instance.

If the sludge or effluent is found to be acceptable for discharge into the DWSO system, then arrangements for measurement and payment shall be developed. As a minimum, DWSO shall be paid the applicable volumetric treatment rate plus the surcharge rates which are in effect at the time of discharge for compatible pollutants. DWSO shall also have the right to assess additional fees for processing the application, performing evaluation sampling and analysis and issuing a Wastewater Unloading Permit. Rates and fees shall be paid in a timely manner in accordance with fee and rate schedules established from time to time by the Detroit Board of Water Commissioners.

The amount to be paid DWSO for treatment of each load shall be determined by sampling and measurement methods established by DWSO for each specific discharge. Payment conditions are to be embodied in the DWSO permit. At DWSO's option, it may require the applicant to post a \$10,000 surety bond to assure payment to DWSO for all materials unloaded into the system and to compensate DWSO for damages suffered by reason of the permittee's non-compliance with all applicable laws, rules, regulations and the DWSO Wastewater Unloading Permit. The life of the bond shall be for the duration of the permit issued by DWSO and any renewals thereof. Upon approval of the application, DWSO will issue a Wastewater Unloading Permit. Each DWSO permit shall be for materials from a specific source for a specific duration or for a specific quantity. The discharge of other than approved materials into the DWSO system is prohibited. The permittee shall be subject to the conditions stated on the permit as well as all applicable laws, rules and regulations.

Permittee shall unload into DWSO's sewerage system only at approved locations. Current listings are available from DWSO's Commercial Division offices at 735 Randolph, Detroit, Michigan 48226.

No discharge shall be made to the DWS system except under a valid DWS Wastewater Unloading Permit. The DWS permit may be revoked if used for any other purpose or source of materials. The DWS permit shall be revoked in the event of non-payment by the permittee for services rendered by DWS.

DWS shall have the right to restrict times and dates during which the permittee may discharge into the DWS system. Such restriction may be in the form of oral or written notice at least four hours in advance of the unloading time.

A copy of the DWS permit shall be carried in the hauling vehicle at all times during which the permitted materials are being hauled.

The hauler shall paint or affix the DWS permit number shown at the top of the applicable DWS permit on each side and the rear of each hauling vehicle covered by the applicable DWS permit in clearly visible locations in black numerals and letters six inches high on a white background at least eight inches high. The line width of each number or letter shall be three-fourths of an inch.

A copy of the MDNR Industrial Waste load manifest shall be provided to the unloading site operator immediately prior to commencing unloading operations for each load.

DWS shall have the unrestricted right to observe the loading, hauling and unloading of hauling vehicles; to obtain representative samples of the vehicle's contents at the unloading site prior to and during the unloading activity; to examine the vehicle operator's MDNR servicing license and vehicle license and the DWS unloading permit at the unloading site; and to question the vehicle operator at the unloading site as to the origin and quantity of material on the vehicle. The vehicle operator shall cooperate in furnishing the above information and assist DWS's representative in obtaining representative samples.

The foregoing rules were enacted by the Detroit Board of Water Commissioners on October 2, 1985 and made effective on January 1, 1986.

DETROIT WATER AND SEWERAGE DEPARTMENT
INDUSTRIAL WASTE CONTROL
HAULED-IN LIQUID WASTE PROGRAM

Application for Detroit Water and Sewerage Department (DWSD) Wastewater Unloading Permits for Hauled-In Liquid Waste

This booklet contains instructions and application materials that are required by the DWSD Hauled-In Liquid Waste Program.

Legal Authority

The City of Detroit Ordinance Section 56-3-59.1(e) specifies that: Unloading liquid or solid waste from hauling vehicles directly into the POTW with or without the benefit of pretreatment is prohibited unless the person proposing to unload such waste has applied for and received a permit from the DWSD for unloading such waste in accordance with the Board Rules pertaining thereto.

Definition of Hauled-In Liquid Wastes

These are liquid wastes that are discharged directly into DWSD's Sewage Disposal System or any tributaries thereof throughout its regional service area by means other than a permanent underground sewer connection from the sewer user's facilities to the public sewer.

Categories of Hauled-In Liquid Wastes

1. Septage Tank Wastes
These wastes include the contents of domestic waste septic tanks, cess-pools, seepage pits, sewage lift stations and portable toilets.
2. Municipal Sludge
This category provides for the sludge or effluent from a Publicly-Owned Treatment Works (POTW), including municipally owned and operated package treatment plants to be discharged into DWSD's System.
3. Grease Trap Cleanings, Waste Cooking and Frying Oils and Greases from Food Establishments
This category of hauled-in wastes can be accepted only if the waste is known to contain no pollutant in excess of DWSD's limits for compatible or noncompatible pollutants.
4. Industrial Wastes
This type of waste includes, but is not limited to, spill cleanups, toxic waste site cleanups, fire cleanups, spent pickling liquor and spoiled products. They will only be accepted if they are known to contain no pollutants in excess of DWSD's limits for compatible or noncompatible pollutants.

Exemptions from Permit Requirements

The following classes of haulers are exempt from the permit requirements:

1. Persons who may discharge the contents of sanitary waste from recreational vehicle toilets, and individual portable toilets with contents less than 125 gallons.
2. Private individuals and firms who possess and service not more than three portable toilets for sanitary waste.

Unloading Sites

1. DWSD, in arrangement with other public agencies, has designated the following as unloading sites:

| | Name of Site | Location | Hours and Days of Operation | Waste Accepted |
|-------|---|---------------------------------------|---|--|
| (i) | Detroit Wastewater Treatment Plant | 9300 W. Jefferson Detroit | 24 hrs./day thru the year | Municipal, Septic, grease trap, Industrial and recreational vehicle toilet |
| (ii) | Oakland County 8 Mile Road Liquid Waste Dump Site #1 | 22440 W. 8 Mile Southfield | 8:30 - 5:00 PM Mon. thru Fri. except holidays | Septic Waste Only |
| (iii) | Oakland County Service Center Liquid Waste Dump Site #2 | 1200 N. Telegraph Pontiac | 8:30 - 5:00 PM Mon. thru Fri. except holidays | Septic Waste Only |
| (iv) | South Eastern Oakland County Sewerage Disposal System | 29132 Stephenson Hwy. Madison Heights | 8:00 to 4:30 PM Mon. thru Fri. only/except holidays | Septic Waste, grease trap; recreational vehicle toilets |

2. Haulers will be permitted into the above unloading sites only if they satisfy the following prerequisites:
 - (i) Septage haulers must possess a valid DWSD unloading permit and have ready for use, appropriate tickets or tokens.
 - (ii) All other haulers must have valid DWSD unloading permits and evidence of prepayment or arrangement for payment of required fees.
 - (iii) Private recreational vehicle toilets of less than 125 gallons are accepted free of charge.

Waste Tracking System

All haulers will be required to comply with the Waste Tracking System, which enables DWSD to track the sources, types and quantities of waste that are being hauled and discharged into the Collection System.

- (i) Maintain in a log form, a list of the SIC Code or waste type, source, address, telephone number, time and date of pickup of waste.
- (ii) Provide a certification on the form that the waste being hauled is in compliance with City and federal regulations for all generators serviced.
- (iii) Every quarter, send copies of the log sheets to the Revenue Section, Industrial Waste Control Division, for evaluation.
- (iv) DWSD will occasionally and at random check the information contained on the form by sampling and comparing the volume noted on the tracking form and by contacting the waste generator to verify that the waste was pumped and hauled from the source indicated on the Waste Tracking Form.

Fees

- (i) For Septage, the DWSD fee is \$10 for a load up to 500 gallons or any lesser fraction thereof. For loads more than 500 gallons, an additional \$10 fee is charged for each additional 500 gallons or fraction thereof for each load.
- (ii) For all other categories of waste, the amount to be paid to DWSD for treatment for each load will be determined for each specific discharge.
- (iii) In addition, operators at unloading sites may charge an additional service fee for use of the sites.
- (iv) All fees are subject to change by DWSD or the authorized agency for its respective portion of the fees.
- (v) Tickets, tokens or coupons may be purchased as follows:
 - (a) For use of unloading sites in Oakland County:

Oakland County Public Works Department
One Public Works Drive
Pontiac, Michigan 48150
Contact: Gary Downhour (Phone: 858-1116)
 - (b) For all other sites:

Accounting Division
Detroit Water and Sewerage Dept. - 10th floor
735 Randolph Street
Detroit, Michigan
Contact: W. Curry (Phone 224-4810)

Completion and Filing of Forms

1. All applications for permits must be made on appropriate forms provided and be fully completed, indicating N/A for items not applicable.
2. All applications for permits must be accompanied by relevant supporting documents identified as follows:
 - (i) Applicants for DWSD Septage Hauler Unloading Permits (initial or renewal) must present a copy of Michigan Department of Natural Resources (MDNR) license to Remove and Transport Septic Tank Waste.
 - (ii) Applicants for DWSD Grease Trap Waste Hauler Unloading Permits (initial or renewal) must present the same supporting documents as in (i). (MDNR treats grease trap waste as septage).
 - (iii) Applicants for DWSD Industrial Waste Hauler Unloading Permit (initial or renewal) must present a copy of State of Michigan Public Act No. 136 - Liquid Industrial Waste Hauler Vehicle License. Additionally, except when waived, they will be required to post a \$10,000 surety bond to compensate DWSD for possible damages. Test results or some verifiable data will be needed to establish the wastewater characteristics of the proposed discharge.

ONLY APPLICATIONS SUPPORTED WITH APPROPRIATE DOCUMENTS WILL BE CONSIDERED.

3. All completed application forms, together with appropriate supporting documents should be sent or mailed to:

Revenue Section
Industrial Waste Control Division
Detroit Water and Sewerage Department
Livernois Center
303 S. Livernois
Detroit, Michigan 48209

4. Application for renewal must be filed at least 30 days before the expiration of current permit. (EXPIRED PERMITS REMAIN INVALID UNTIL RENEWAL APPLICATIONS ARE FULLY PROCESSED AND APPROVED).

5. For further information and questions, please contact:

Revenue Section
Industrial Waste Control Division
297-9400

OE/bjs

CITY OF DETROIT
 WATER AND SEWERAGE DEPARTMENT
 INDUSTRIAL WASTE CONTROL DIVISION
 303 S. Livernois, Detroit, Michigan 48209

APPLICATION FOR
 WASTEWATER UNLOADING PERMIT
 (not for domestic septage)

Application is hereby made for a Detroit Water and Sewerage Department (DWSD) Wastewater Unloading Permit. (Such permit is required for persons proposing to unload municipal sludge or wastewater or industrial or commercial sludge or wastewater of any kind or any source into the DWSD sewerage system or any tributary thereof).

A. GENERAL INFORMATION

1. Name of Hauling Company _____ EPA/MDNR ID No. (if any) _____
2. Address _____
3. Name of Chief Executive Officer _____
4. Telephone _____

B. WASTEWATER CHARACTERISTICS:

1. Type of Wastewater/Sludge: (i) Industrial _____ (ii) Grease Trap _____
 (iii) Municipal Sludge _____ (iv) Others (describe) _____

Attach test-results or any verifiable data on all pollutants including compatibles: BOD, TSS, P, and FOG, suspected or believed to be present in proposed discharge. For certain types of wastes, DWSD may require the hauler to post a \$10,000 Surety bond.

2. Name and address of generating facility _____

Contact person _____ phone _____

C. HAULING VEHICLE INFORMATION: List all vehicles that will be used under this permit (attach additional sheet, if necessary, and a copy of your MDNR License)

UNIFORM SURETY BOND

(Surety Bond Number) _____

NOTE: Unless instructions on the attached sheet are followed, this bond will be invalid.

KNOW ALL MEN BY THESE PRESENTS, That (1) _____ as principal,
Business Address (2) _____

and (3) _____ as surety are
held and firmly bound unto the City of Detroit, County of Wayne, State of Michigan, in
the penal sum of (4) _____ Dollars,
lawful money of the United States of America, to be paid to the City of Detroit, or to
its certain Attorney, to which payment well and truly to be made, we and each of us do
bind ourselves, our heirs, executors, and administrators, jointly and severally, and
every one of them firmly by these presents.

In consideration of this surety, the principal may perform the lawful services by
permit or license that are inherent in the occupation of (5) _____,
provided that he meets all of the requirements as stated in said permit or license.

NOW, THEREFORE, The condition of this obligation is such that the said principal
shall save harmless and indemnify the City of Detroit from all claims, damages, ex-
penses, suits and proceedings of every kind and nature which may arise by reason of the
issuance of said permit and/or license, and shall observe the faithful performance of
the terms of said permit or license, then this obligation to be null and void, otherwise
to remain in full force and effect. Coverage hereunder shall be for the term starting
as of (7) _____, 19____, and expiring on

(8) _____ 19____. Signed, sealed and dated this (8a) _____
(SEE INSTRUCTIONS)
day of _____ 19____.
