**GLWA/DWSD Joint Statement on the Intense Weather Band
That Impacted An Area of Detroit's East Side**

DETROIT -- An intense band of rain activity came through an area of the eastside of Detroit earlier today and may have resulted in isolated areas of flooding. We recognize the impact this may have had on the residents in this area and have begun evaluating the system's response to the intense band of rain activity.

DWSD offers flood safety tips and a handbook at <https://detroitmi.gov/departments/water-and-sewerage-department/dwsd-resources/dwsd-flood-safety-and-reduction-tips>.
