

## **MEDIA SEVERE WEATHER ALERT UPDATE – June 24, 2025**

**GLWA Chief Operating Officer, Wastewater Operating Services, Navid Mehram:**

GLWA wants to alert the community, especially those in low lying areas and who have previously experienced flooding, that due to the current uncertainty of the [forecasted weather](#) for this week, GLWA is taking enhanced storm precautions to ensure continued service delivery. Given slow storm motions and high precipitable water values, any thunderstorm observed will be capable of heavy downpours leading to highly localized rainfall accumulation totals.

The regional system is currently in dry condition and operating as designed. GLWA's operations teams are actively monitoring the evolving forecast and prepared to respond swiftly to any weather-related impacts.

GLWA is asking residents in low-lying areas that are prone to flooding during heavy rainfall to remain vigilant and out of an abundance of caution, to remove items of value from their basements.
