Subject: **Notice to Residents – Winter Road Maintenance on Navahoe Street**  
Great Lake Water Authority  
Freud Sanitary Pump Station Improvements Project

Dear Residents of Navahoe,

We appreciate your patience during ongoing construction and want to provide an important update. The southbound lane of Navahoe Street between E. Jefferson Avenue and Freud Street will not be paved this winter due to seasonal weather restrictions that prevent proper asphalt installation.

Instead, the lane will remain as compacted gravel until conditions allow paving in the spring. To ensure safety and accessibility during this period, Kokosing has implemented a Winter Maintenance Plan for Navahoe Street. The plan is available on the Freud Sanitary Pump Station website at <https://www.glwater.org/freud-sanitary-pump-station/>.

If you have any questions or concerns, please contact the Freud Sanitary Pump Station project team 24/7 via the Kokosing Hotline at 313-960-7687.

We appreciate your understanding and cooperation as we work to maintain safe and functional roadways during the winter season.

Sincerely,

Adam Kolwicz
